## **SUMMER MANAGEMENT SPECIAL FEATURE**

### **7. No fly zone**

**ARNYWEAR** is a fabric designed to create a force field that repels midges and other flying insects when it moves. It also releases a natural insect repellent.

According to the manufacturer, the material can be worn as a neck tie or placed under the saddle to create a 50cm insect-free zone

around the rider. The fabric is activated by body movement or by rubbing and will hold its properties for at least 10 washes. Those midges had better watch out.

**Price:** from £7.99

according to fabric size
